TESTO DESCRITTIVO

Direct Energy Deposition Sample of repairing (Application of Laserdyne DED Machines)

Ingombro: 12x5,5x6 cm (LxPxH)

Peso: 1,5 kg

Blade profile reported: (3 axes deposition)

Original base

SECTOR	Oil&Gas / Aerospace
PURPOSE OF PART	Turbine blade Repairing

TECHNICAL DETAILS	Build time*: 12 minute; Dimension of the material reported: 120 mm x 35 mm x 5 mm (LxWxH) Base material: Inconel 792SX; Layer thickness: 0.5 mm; Material: Inconel625; *Build Speed is depending on the application. It is influenced by many factors and it is not related only to the part volume.
