TESTO DESCRITTIVO

Velo3D Sapphire® Family of Metal 3D Printers

The [Sapphire](#) family of printers are next-generation laser powder bed fusion metal AM printers. With a re-engineered optics center, optimized gas flow, and a unique non-contact recoater, Sapphire® printers are capable of printing today's most advanced geometries. Furthermore, with nearly 1,000 separate sensors and onboard calibration routines, Sapphire® printers are ready to meet exacting quality standards for today's most challenging industries.

The Velo3D Sapphire® Family of Printers includes

1. Sapphire® — 315 mm Ø x 400 mm z with two 1kW lasers
2. Sapphire® 1MZ — 315 mm Ø x 1000 mm z with two 1kW laser
3. Sapphire® XC — 600 mm Ø x 550 mm z with eight 1kW lasers
